TECHNICAL SKILLS

Frontend	JavaScript, TypeScript, React, Redux, jQuery, SCSS, HTML, WCAG AAA Accessibility
Backend	Java, Spring, AEM (Sites, Assets, Dispatcher), Python, SQL, Okta, JWT
Adobe Stack	AEM Sites, AEM Assets, AEM Dispatcher, GenStudio, Workfront, Workfront Fusion
AI & Automation	Claude Code, Prompt Engineering, AI-Augmented Dev Workflows, Workfront Fusion
DevOps & Tooling	Git, GitHub, Jira, ADO, Agile/Scrum, CI/CD Pipelines, Maven, Vite
Testing	Vitest, Playwright, Jest, Cypress, React Testing Library, JUnit

PROFESSIONAL EXPERIENCE

Consultant — Full Stack Developer | Slalom Consulting   Jun 2022 — Present

`AEM | Java | JavaScript | TypeScript | React | jQuery | Claude Code`

- Digital Experience Management consultant delivering enterprise CMS solutions, platform migrations, website redesigns, and marketing automation for Fortune 500 and large healthcare clients
- Promoted from Associate Consultant to Consultant within 6 months; nominated for Employee of the Quarter for exceptional client delivery and team leadership
- Pioneer AI-augmented development practices on the team — leveraging Claude Code and prompt engineering to accelerate delivery timelines, improve code quality, and automate repetitive development tasks
- Lead client-facing activities including technical demos, discovery workshops, requirements gathering, UAT sessions, and post-launch training for content authors and administrators
- Mentor junior developers on AEM architecture, component development patterns, and enterprise development best practices

Dentaquest — Enterprise AEM Implementation   2023

`AEM Sites | Java | JavaScript | React | SCSS | Maven`

- Lead developer on a greenfield AEM Sites implementation for a leading dental benefits provider serving millions of members
- Architected and built custom AEM components integrating React SPA modules into the AEM page editor, enabling content authors to manage dynamic content without developer intervention
- Developed AEM Sling Models, servlets, and OSGi services in Java to support complex content structures and third-party API integrations
- Implemented responsive SCSS design system ensuring consistent brand experience across desktop, tablet, and mobile breakpoints

Mass General Brigham — Enterprise Website Redesign   2022 — 2023

`AEM Sites | Java | JavaScript | jQuery | SCSS | Dispatcher`

- Core developer on a full website redesign for Massachusetts' largest healthcare employer, serving 80,000+ employees and millions of patients
- Built accessible AEM components achieving WCAG AAA compliance across the site, meeting strict healthcare accessibility requirements
- Developed custom AEM workflows and content fragment models to streamline editorial processes for a large distributed content team
- Configured AEM Dispatcher caching rules and CDN integration for high-traffic pages, improving page load performance
- Participated in triage, issue resolution, and cross-team coordination across multiple vendor teams during parallel development

Internal & Cross-Client Initiatives

- Developed reusable AEM project archetypes and component libraries to accelerate onboarding for new Slalom AEM engagements
- Led internal knowledge-sharing sessions on AEM development patterns, AI-augmented workflows, and accessibility best practices
- Contributed to pre-sales technical discovery and estimation for prospective Adobe/AEM client engagements

Professional Poker Player │ Self Employed   2009 — 2020

- World Series of Poker bracelet winner with career net profits exceeding $2 million across live and online tournaments
- Applied rigorous data analysis, probability modeling, and risk management frameworks to inform real-time strategic decisions under uncertainty
- Self-directed career requiring exceptional discipline, continuous skill development, and sustained performance under high-pressure conditions

PROJECTS

Portfolio Website — AI-Augmented Full Stack Modernization   2024

`React 18 | TypeScript | Vite | Vitest | Playwright | Claude Code`

- Modernized personal portfolio from Create React App / JavaScript to Vite / TypeScript using AI-augmented development with Claude Code, demonstrating modern full-stack engineering practices
- Implemented 86+ unit/integration tests (Vitest + React Testing Library) and 33+ E2E tests (Playwright) with visual regression baselines
- Achieved WCAG AAA accessibility compliance with semantic HTML, full keyboard navigation, ARIA attributes, and automated axe-core audits

Boys & Girls Club Emotion Tracker — Full Stack Capstone   2021

`React | Java | Spring | Okta | Ant Design`

- Full stack application enabling children to provide real-time emotional feedback, giving staff actionable data for program improvement
- Architected Spring backend with Okta authentication designed to scale from 4,400 current users to 4,000,000+

EDUCATION

Bloom Institute of Technology │ Full Stack Web Development & Computer Science   2021
- 6-month intensive covering JavaScript, React, Redux, Java, Spring, Python, SQL, and agile methodology
